

Esco Multi-Zone ART Workstation & Airstream® for ART

Assisted Reproductive Technology (ART) Workstations

Experience Design Excellence.

The Esco Multi-Zone Workstation is packed with features that help ensure optimal results, especially for gamete and embryo manipulation during in vitro fertilization.

The Airstream® Laminar Flow comes in variants from 3 feet wide to 6 feet wide, with a side glass wall or a stainless steel wall. Choose the laminar flow bench model that fits your laboratory's requirements, not the other way around.

Esco Multi-Zone ART Workstation

Esco Multi-Zone ART Workstation — for superior, gentle handling of your embryos

FEATURES:

Touchscreen Monitor

The touchscreen monitor is a fully functional Windows PC with exceptional features:

- Observe and record culture behavior in real-time via built-in microscope camera function.
- Provides real-time information of the zone performance and other work area parameters such as gas pressure and flow rate.

Multi-Zone Heating System with Four (4) Temperature Modes

There is one set point for 10 independent zones. Each zone has its own heating elements and sensors that allow for uniform heat distribution. The heating system will automatically prioritize power distribution to ensure effective temperature control with fast recovery.

- Temperature Accuracy: $\pm 0.2\text{ }^{\circ}\text{C}$
- Temperature Uniformity: $\pm 0.2\text{ }^{\circ}\text{C}$

Humidification System

The humidification system allows for digital control of the premixed gas. This enables complete environmental control for the samples. The gas outlet port is located on the table surface. The plastic cover encloses the humidified gas which then creates a small incubator.

Heated Glass Stage

The heated glass stage has dedicated power supply to ensure temperature control and recovery in this zone.

SC-1 LED Light Source

Microscope Integration Provision

Having an integrated stereomicroscope in the work area makes it possible to handle embryos and gametes while keeping culture dishes at the right temperature. Fewer movements reduce the risk of accidents.

For Assisted Reproductive Technology (ART)

High-tech components and features are designed in Denmark and made in Esco's production facilities in Europe.

The workstation exemplifies Esco's world-class expertise and work quality in cleanroom technology.

Energy Efficiency Chart

Esco ART Workstations utilize ECM blowers, allowing for low levels of cabinet power consumption without compromising cabinet performance.

It also has Standby mode that further reduces power consumption while the cabinet is not in use.

Air Cleanliness Standards (ISO 14644.1, Air Cleanliness Particle Limits) (No. of Particles / m ³)						
Particle Size (µm)	Cleanliness Class					
	Class 1	Class 2	Class 3	Class 4	Class 5	Class 6
0.1	10	100	1000	10000	100000	1000000
0.2	2	24	237	2370	23700	237000
0.3	1	10	102	1020	10200	102000
0.5	-	4	35	352	3520	35200
1.0	-	-	8	83	832	8320
5.0	-	-	-	3	29	293

Superior Air Cleanliness

Esco cabinets provide ISO Class 3 air cleanliness within the workzone as per ISO 14644.1, significantly cleaner than the conventional Class 4 classification offered by the competition.

Isocide™ Powder Coat

Isocide™ is a silver-ion impregnated powder coat that inhibits microbial growth to improve safety.

Esco Multi-Zone ART Workstation

- Vertical laminar airflow providing sample protection
- Low-noise, energy-efficient ECM blowers
- Vibrations lessened by built-in dampers
- Has provisions for the integration of most microscopes
- Integrated heated glass stage
- Integrated SC-1 LED light source with dual-sided mirror and intensity control knob
- A selection of cabinet support stands
- Between 4ft. (single) and 6ft. (single, dual, multipurpose, or with MIRI® chambers) models

Less Noise, Less Vibrations

Esco Multi-Zone ART Workstation has a state-of-the-art design that allows for much lower noise and vibration levels, making the workstation suitable for sensitive microscopic work.

- 2x smaller high-efficiency ECM blower create lesser noise and vibrations than 1 big blower fan.
- Passive dampers, located along the connection of the tableplate to the cabinet frame, effectively diminish vibrations.

Cable Pass-Through Tunnels

The Esco Multi-Zone ART workstation has a convenient way for electrical cables of other equipment and/or accessories (i.e., a camera) to pass through its back wall. This provides a cleaner and more organized interior that should help improve your IVF workflow.

Esco Multi-Zone ART Workstation (MAW) Single Microscope

MAW-3D8

- Width: 3 Feet
- Microscope: Single
- Basic Configuration
- 1 user
- For small laboratories

General Specifications

Esco Multi-Zone ART Workstation (MAW)

Model	MAW-3D8	MAW-4D_	MAW-6D_-MONO	MAW-6D_-DUAL	MAW-6D_-MP
Nominal Size	0.9 meter (3')	1.2 meter (4')	1.8 meter (6')		
Internal Work area dimensions (width x depth x height)*	955 x 500 x 710 mm (37.6" x 19.7" x 28.0")	1260 x 500 x 710 mm (49.6" x 19.7" x 28.0")	1870 x 500 x 710 mm (73.6" x 19.7" x 28.0")		1870 x 490 x 780 mm (76.8" x 19.3" x 30.7")
External dimensions without support stand (width x depth x height)	1035 x 640 x 1400 mm (40.8" x 25.2" x 55")	1340 x 640 x 1300 mm (52.8" x 25.2" x 51.2")	1950 x 640 x 1300 mm (76.8" x 25.2" x 51.2")		1950 x 647 x 1360 mm (76.8" x 25.4" x 53.5")
External Dimensions with "B" type support stand (width x depth x height)	1035 x 640 x 2160 mm (40.8" x 25.2" x 85")	1340 x 640 x 2160 mm (52.8" x 25.2" x 85.0")	1950 x 640 x 2160 mm (76.8" x 25.2" x 85.0")		1950 x 647 x 2220 mm (76.8" x 25.4" x 87.4")
Cabinet Construction	Main Body	1.2 mm (0.05") 18 gauge electro-galvanized steel with white oven-baked epoxy-polyester powder coated finish			
	Work Zone	1.5 mm (0.6") gauge 16 stainless steel, grade 304	1.2 mm (0.05") 18 gauge stainless steel, grade 304		
	Side Walls	Tempered Glass (Optional: Polycarbonate sash for MAW with built-in UV light)			
	Sash				
Laminar air velocity	Average of 0.21m/s or 41 fpm (± 20%)				
Filter efficiency	>99.999% for particle size between 0.1 to 0.3 microns per IEST-RP-CC001.3 / H14 per EN 1822				
Pre-filter	Disposable and non-washable polyester fibers with 85% arrestance / EU3 rated				
Noise level (per NSF 49)**	<48 dBA	47 dBA	52 dBA		
Set of (9+1) heating zones	1 set	1 set	1 set	2 sets	1 set
Surveillance System with data logger	1 set	1 set	1 set	2 sets	1 set
Humidification System***	1 set	1 set	1 set	2 sets	1 set
PT 1000 ports	5 ports	5 ports	5 ports	10 ports	5 ports
Microscope	Required Not included (see microscope ordering information)				
	Position for 1 microscope			Position for 2 microscopes	Position for 1 microscope and 1 inverted microscope
Transmitted light source	1 set	1 set	1 set	2 sets	1 set
Support stand	Required, Not included (see support stand ordering information)				
Shipping dimensions (width x depth x height)	1120 X 820 X 1920 mm (44.1" x 32.3" x 75.6")	1450 x 850 x 1920 mm (57.1" x 33.5" x 75.6")	2050 x 850 x 1890 mm (80.8" x 33.5" x 74.4")		
Shipping weight	195 kg	280 kg	372 kg		

* The actual MAW-6D_-MP's work area dimension will be customized to fit the inverted microscope.

** Noise reading in open field condition / anechoic chamber. Noise reading in normal room varies by room size, layout, and background noise, but may reach roughly 3-4 dBA above these values.

***1 set of humidification system includes one (1) water bottle with tubing, one (1) sample carry tray and one (1) plastic cover.

Indication for Use Statement

The Esco Multi-Zone ART Workstation is a laminar flow workstation with controlled temperature and humidity working environment. The workstation is intended for working with gametes and / or embryos at / or near body temperature in a Multi-Zone heated set up during in vitro fertilization (IVF) / assisted reproductive technology (ART) treatments.

Caution

- Federal law restricts this device to sale by or on the order of a licensed healthcare practitioner.
- Only to be used by a trained and qualified professional. The device is sold under exemption specified in 21 CFR 801 Subpart D.

Esco Multi-Zone ART Workstation with MIRI® Chambers

The Esco is now even better with its integrated MIRI® chambers to further secure your embryos while inside the workstation. The MIRI® incubator is popular for its top-notch features such as stable culture environment and faster parameter recovery.

Multi-Zone Heating System

There is one set point for 8 (7+1) independent zones with their own heating elements and sensors.

MIRI® Chambers

Your specimens are more secure than ever with the integrated MIRI® chambers, known for their stable and precise temperature regulation.

UV Kit (Optional)*

It can hold a UV lamp for work zone decontamination. It also comes with polycarbonate front cover for UV shield and magnetic interlock for safety mechanism when the cover is removed.

Support Stand Options

The workstation offers more options to choose from to meet your requirements. Please see page 16.

Airstream®

Horizontal and Vertical Laminar Flow

Horizontal Laminar Flow

Airflow Sensor

- Monitors real-time airflow for safety
- Alerts the user if airflow is insufficient

Ergonomic Control Panel Location

- Centered and angled down for easy reach & viewing
- ADA-Compliant

Worktop

The spill-retaining worktop design with a recessed central area holds any accidental liquid spills.

Airstream® Horizontal Laminar Flow Clean Bench, Model LHG-4

Guide to Models

1st Placeholder Product Line	2nd Placeholder Flow	3rd Placeholder Side Wall	4th Placeholder Width	5th Placeholder Internal Height	6th Placeholder Control	7th Placeholder Window	8th Placeholder Electrical
Laminar Flow	L	Glass	3 feet	2 feet	Sentinel™ Gold	Fixed	230 VAC, 50 / 60 Hz
		Stainless Steel	4 feet	2.5 feet			115 VAC, 50 / 60 Hz
			5 feet	3 feet			
			6 feet				
			8 feet				

Example Code: LHG-4BG-F8

Specifications: Laminar flow cabinet, Horizontal Flow, Glass sided walls, 4 ft width, 2.5 ft internal height, Sentinel™ Gold microprocessor controller, Fixed window and 230 VAC, 50/60 Hz

FEATURES:

Energy-Efficient DC ECM Motor

- Powered by latest generation DC ECM motor that is more efficient than the legacy ECM and VFD motors
- 70% energy savings compared to an AC motor
- Stable airflow, despite building voltage fluctuations & filter loading
- Standby mode to further reduce power consumption (Standby mode provides ISO Class 5 workzone.)

ULPA Filter

- The 10x filtration efficiency of HEPA filter creates ISO Class 3 work zone instead of industry-standard ISO Class 5.
- It deliver a 10x cleaner work zone than cabinets with HEPA filter.

Sentinel™ Gold Microprocessor Controller

- Displays all safety information on one screen
- Standby mode switch to further save energy
- Programmable UV timer to extend UV lamp life

ISOCIDE™ Powder Coat

- Silver-ion impregnated powder coat
- Inhibits microbial growth to improve safety

Quiet Operation

- World's leading low-noise laminar flow cabinet
- Comfortable noise level at 53 dBA *LVG-4A in an open field condition
- Reduces fatigue and improves work concentration

	Cabinet Performance	Air Quality	Filtration	Electrical Safety
Standards Compliance	IEST-RP-CC002.2, Worldwide	ISO 14644.1, Class 3, Worldwide AS 1386 Class 1.5, Australia JIS B9920, Class 3, Japan	EN-1822 (H14), Europe IEST-RP-CC001.3, Worldwide IEST-RP-CC007, Worldwide IEST-RP-CC034.1, Worldwide	IEC61010-1, Worldwide EN 61010-1, Europe UL61010-1, USA CAN/CSA-22.2, No.61010-1

Vertical Lamina Flow

Airflow Sensor

- Monitors real-time airflow for safety
- Alerts the user if airflow is insufficient

Sash Window

- Polycarbonate Fixed Sash
- UV-Resistant Tempered Glass
- Manual Sliding Sash with Counter-Balance System (Only for LVG-XXX-SX)

Ergonomic Control Panel Location

- Centered and angled down for easy reach & viewing
- ADA-Compliant

Worktop

The spill-retaining worktop design with a recessed central area holds any accidental liquid spills.

Quiet Operation

- World's leading low-noise laminar flow cabinet
- Comfortable noise level at 53 dBA *LVG-4A in an open field condition
- Reduces fatigue and improves work concentration

Airstream® Vertical Laminar Flow Clean Bench, Model LVG-4AG-S8

FEATURES:

Energy-Efficient DC ECM Motor

- Powered by latest generation DC ECM motor that is more efficient than legacy ECM and VFD motors
- 70% energy savings compared to an AC motor
- Stable airflow, despite building voltage fluctuations & filter loading
- Standby mode to further reduce power consumption (Standby mode provide ISO Class 5 workzone.)

ULPA Filter

- The 10x filtration efficiency of HEPA filter creates ISO Class 3 work zone instead of industry-standard ISO Class 5.
- It deliver a 10x cleaner work zone than cabinets with HEPA filter.

Sentinel™ Gold Microprocessor Controller

- Displays all safety information on one screen
- Standby mode switch to further save energy
- Programmable UV timer to extend UV lamp life

Vertical Laminar Flow

Cabinet Filtration System

- Room air is taken in from the top of the clean bench through a disposable pre-filter with 85% arrestance. This traps larger particles and increases the life of the main filter.
- Air is forced evenly across the ULPA/H14 filter. The result is a stream of clean laminar air within the workzone of the clean bench. This, in turn, dilutes and flushes all airborne contaminants from the interior.
- A nominal filter face velocity of 0.45 m/s or 90 fpm ensures that there is a sufficient number of air changes within the enclosed area of the clean bench to maintain cleanliness.
- The purified air travels across the working zone of the clean bench in a vertical, unidirectional stream and leaves the main work chamber across the entire open front of the clean bench and through Auto-Purge™ slots at the back wall of the work zone which are designed to eliminate air turbulence and the possibility of dead air corners in the work zone.

Recommendations on Selecting the Most Suitable Laminar Flow Equipment

- Determine your application needs:
 - Sensitive samples - use the Horizontal Type (nearer to filter for better product protection)
 - Large samples - use the Vertical Type
- Determine your work area needs (2 ft to 3 ft work zone height)
- Determine your laboratory space (3 ft to 8 ft external width)
- Determine your convenience (glass sidewall or stainless steel sidewall)

ESCO LIFESCIENCES GROUP

- Global Offices
- Licensee
- Distributors
- Factories
- R&D Centers
- Regional Distribution Centers

Esco Medical Products:

- MIRI® TL6 Time-Lapse Incubator
- MIRI® TL12 Time-Lapse Incubator
- MIRI® Multiroom Incubator
- MIRI® II-12 Multiroom Incubator
- Mini MIRI® Dry Incubator
- Mini MIRI® Humidity Incubator
- Esco Multi-Zone ART Workstation
- CelCulture® CO₂ Incubator
- MIRI® GA (Gas and Temperature Validation Unit)
- Anti-Vibration Table (AVT)
- Versati™ Tabletop Refrigerated Centrifuge
- CultureCoin®

Infertility is a problem that has a significant social, psychological, and economic impact on afflicted individuals and couples. It is a global concern that knows no race or creed. It has been estimated that 1 in 6 couples struggle with infertility at least once in their lifetime.

Esco Medical is one of the divisions of the Esco Lifesciences Group. We provide innovative technological solutions for fertility clinics and laboratories. We aim to become the leading manufacturer of high-quality equipment such as long-term embryo incubators, ART workstations, anti-vibration tables, and time-lapse incubators.

Our products are designed with the Silent Embryo Hypothesis as a guiding principle. The Silent Embryo Hypothesis states that the less disturbed an embryo can remain, the better its developmental potential will be. Most of our products are designed in Denmark and made in the EU. Our primary focus is to increase pregnancy success rates and patient satisfaction.
